Jotul F370 Advance

The Jøtul F 373 Advance is characterised by its modern design where the combustion chamber sits on a pedestal. This model is a re-design of the only wood stove in the world to have won the prestigious, international "Red dot design award: best of the best."

The Jøtul F 371 Advance is characterised by a base in a sleek design, clean lines and a practical shelf for storage in its base.

Jøtul F 377 Advance includes elegant and heat-retaining décor from soapstone. It also features a practical storage space in the base with a detachable shelf for increased flexibility.

Jøtul F 377 HT Advance is a tall product made from cast iron and soapstone. It has an elegant and modern design where you can integrate hidden, heat accumulating stones.
